FEATURED CASE STUDIES

ClaimFlow

Healthcare — Revenue Cycle Management & Claims Operations

Client: Noridian

8 months | Full Lifecycle Product Development

Challenge:
Noridian's medical practice network spanning 50+ providers was hemorrhaging revenue through operational inefficiency. Over $2M in annual claim denials, a 45-day average collection ...

Solution:
Aark Connect implemented ClaimFlow, an end-to-end revenue cycle management platform. The system performs automated charge capture, real-time eligibility verification, and AI-assist...

35% denial reduction • $1.2M revenue recovered • 28-day collection cycle • 100% HIPAA compliant

Technologies: Java, Spring Boot, React, HL7 FHIR, AWS, EDI 837/835

Reference: Available upon request

DentaLogic

Healthcare — Claims Processing & Revenue Cycle

Client: TrueCare (Dental Payer)

14 months | Full Lifecycle Product Development

Challenge:
TrueCare's claims operation was under critical strain. Processing over 500,000 dental claims per month, ~70% required manual review at 8 minutes each. The result: a 3-week claims b...

Solution:
Aark Connect designed and deployed DentaLogic, an AI-powered NLP-based claims adjudication engine. The platform performs real-time benefit verification, validates CDT codes against...

85% auto-adjudication • $3.2M annual savings • 2-day turnaround • <1 min processing

Technologies: Java, Spring Boot, Drools Rules Engine, Oracle, Angular, Kafka

Reference: Available upon request

AARK CONNECT

PeopleFlow

Enterprise SaaS — Human Resource Management

Client: Cybernova

4 months | Full Lifecycle Product Development

Challenge:

Cybernova's HR operations were fragmented — leave tracking in spreadsheets, paper-based reviews, disconnected payroll, no centralized employee database. HR staff spent 60% of time ...

Solution:

Aark Connect built PeopleFlow, a comprehensive cloud-native HRMS. The platform provides a unified employee database with modules spanning onboarding, leave tracking with multi-tier...

70% admin time saved • 100% digital workflows • SOC 2 Type II • 41 feature modules

Technologies: Spring Boot, React, PostgreSQL, JWT Auth, REST APIs

Reference: Available upon request

ADDITIONAL PAST PERFORMANCE

SurgiSync

Healthcare — Supply Chain Management

Client: Ambulatory Surgery Center Network

11 months

Built SurgiSync, a specialized supply chain platform with real-time inventory tracking across all locations, automated par-level reordering, vendor catalog mana...

28% cost reduction • 99.4% case readiness • 60% order time saved • 25+ ASCs connected

Technologies: Java, Spring Boot, React, PostgreSQL, EDI 850/855, AWS

EduPath

Education — Learning Management System

Client: K-12 School District (15,000 Students)

10 months

Built EduPath, a modern K-12 learning platform with course management, assignment submission with plagiarism detection, grade books, parent/guardian portal, att...

50K concurrent users • 89% parent engagement • 40% teacher time saved • Section 508 compliant

Technologies: Next.js, Node.js, PostgreSQL, WebSocket, AWS, React Native

CoreSync ERP

Manufacturing — Enterprise Resource Planning

Client: Regional Manufacturing Company

12 months

Deployed CoreSync ERP, a modular platform integrating inventory management, procurement, sales orders, production planning, financial accounting, and BI. Built ...

45% inventory reduction • 99.2% order accuracy • 3-day month-end close • 22% productivity gain

Technologies: Java, Angular, PostgreSQL, Redis, Docker, Kubernetes

TalentFlow

Recruitment & Staffing — AI Portal

Client: Staffing Agency

3 months

Developed TalentFlow, an intelligent recruiter portal with AI-powered bulk resume generation, candidate pipeline management, job matching algorithms, analytics ...

99.5% time savings • 97% cost reduction • 10x capacity increase • 90% MVP in 3 months

Technologies: Next.js, TypeScript, Prisma, Claude AI, PDF Generation, PostgreSQL

DIFFERENTIATORS

%¸ Engineering Discipline
Every engagement is a product build with architecture reviews, code quality gates, and delivery accountability.

%¸ Domain Depth
Deep expertise in healthcare, financial services, government, and education with compliance built in from day one.

%¸ Security-First
ISO 27001 certified. Security embedded into engineering process, infrastructure design, and delivery methodology.

%¸ Senior-Heavy Team
95% senior-level engineers with 18+ average years of experience. Battle-tested engineers who ship at scale.

%¸ End-to-End Ownership
From discovery through deployment and managed support — one accountable partner, full lifecycle.
